# Table of Contents

## Session 1

A Dynamic Programming Approach to Categorial Deduction .......................... 1  
*Philippe de Groote*

Tractable Transformations from Modal Provability Logics into First-Order Logic .................................................................................................................. 16  
*Stéphane Demri and Rajeev Goré*

## Session 2

Invited Talk: Decision Procedures for Guarded Logics ................................. 31  
*Erich Grädel*

A PSpace Algorithm for Graded Modal Logic .............................................. 52  
*Stephan Tobies*

## Session 3

Solvability of Context Equations with Two Context Variables Is Decidable 67  
*Manfred Schmidt-Schauß and Klaus U. Schulz*

Complexity of the Higher Order Matching .................................................. 82  
*Tomasz Wierzbicki*

Solving Equational Problems Efficiently ....................................................... 97  
*Reinhard Pichler*

## Session 4

VSDITLU: A Verifiable Symbolic Definite Integral Table Look-Up .......... 112  
*A. A. Adams, H. Gottliebsen, S. A. Linton, and U. Martin*

A Framework for the Flexible Integration of a Class of Decision Procedures into Theorem Provers ................................................................. 127  
*Predrag Janičić, Alan Bundy, and Ian Green*

Presenting Proofs in a Human-Oriented Way ............................................. 142  
*Helmut Horacek*

## Session 5

On the Universal Theory of Varieties of Distributive Lattices with Operators: Some Decidability and Complexity Results ......................... 157  
*Viorica Sofronie-Stokkermans*

Session 8: System Descriptions

System Description: Kimba, A Model Generator for Many-Valued First-Order Logics ............................................. 282
   Karsten Konrad and D. A. Wolfram

System Description: Teyjus—A Compiler and Abstract Machine Based Implementation of λProlog .......................... 287
   Gopalan Nadathur and Dustin J. Mitchell

Vampire ......................................................... 292
   Alexandre Riazanov and Andrei Voronkov

System Abstract: E 0.3 ......................................... 297
   Stephan Schulz

Session 9

Invited Talk: Rewrite-Based Deduction and Symbolic Constraints .......................... 302
   Robert Nieuwenhuis

Towards an Automatic Analysis of Security Protocols in First-Order Logic 314
   Christoph Weidenbach

Session 10

A Confluent Connection Calculus .................................. 329
   Peter Baumgartner, Norbert Eisinger, and Ulrich Furbach

Abstraction-Based Relevancy Testing for Model Elimination ......................... 344
   Marc Fuchs and Dirk Fuchs

A Breadth-First Strategy for Mating Search .................................. 359
   Matthew Bishop

Session 11: System Competitions

The Design of the CADE-16 Inductive Theorem Prover Contest ...................... 374
   Dieter Hutter and Alan Bundy

Session 12: System Descriptions

System Description: SPASS Version 1.0.0 ................................ 378
   Christoph Weidenbach, Bijan Afshordel, Uwe Brahm, Christian Cohrs,
   Thorsten Engel, Enno Keen, Christian Theobalt, and Dalibor Tpopić

KM: A Theorem Prover for K .................................. 383
   Andrei Voronkov
System Description: CYNTTHIA .......................... 388
     Jon Whittle, Alan Bundy, Richard Boulton, and Helen Lowe

System Description: MCS: Model-Based Conjecture Searching ........ 393
     Jian Zhang

Session 13

Invited Talk: Embedding Programming Languages in Theorem Provers ... 398
     Tobias Nipkow

Extensional Higher-Order Paramodulation and RUE-Resolution .......... 399
     Christoph Benzmüller

Automatic Generation of Proof Search Strategies for Second-Order Logic . 414
     Raul H. C. Lopes

Author Index ......................................................... 429
