# Table of Contents

## Invited Papers

Improving Flow in Software Development Through Graphical Representations .......................... 1  
*Margaret-Anne D. Storey*

A Perspective on Graphs and Access Control Models .......................... 2  
*Ravi Sandhu*

Transformation Language Design: A Metamodelling Foundation .............. 13  
*Tony Clark, Andy Evans, Paul Sammut, and James Willans*

## Integration Technology

Rule Execution in Graph-Based Incremental Interactive Integration Tools ....... 22  
*Simon M. Becker, Sebastian Lohmann, and Bernhard Westfechtel*

Composition of Relations in Enterprise Architecture Models .................. 39  
*René van Buuren, Henk Jonkers, Maria-Eugenia Iacob, and Patrick Strating*

Event-Driven Grammars: Towards the Integration of Meta-modelling and Graph Transformation ................................................................. 54  
*Esther Guerra and Juan de Lara*

## Chemistry and Biology

Analysis of Metabolic Pathways by Graph Transformation ..................... 70  
*Francesc Rosselló and Gabriel Valiente*

The Potential of a Chemical Graph Transformation System ................... 83  
*Maneesh K. Yadav, Brian P. Kelley, and Steven M. Silverman*

## Graph Transformation Concepts

Concepts for Specifying Complex Graph Transformation Systems .......... 96  
*Boris Böhlen and Ulrike Ranger*

Typing of Graph Transformation Units .................................................. 112  
*Renate Klempien-Hinrichs, Hans-Jörg Kreowski, and Sabine Kuske*
Towards Graph Programs for Graph Algorithms ...................... 128
  Detlef Plump and Sandra Steinert

DPO Theory for High-Level Structures

Adhesive High-Level Replacement Categories and Systems ............ 144
  Hartmut Ehrig, Annegret Habel, Julia Padberg, and Ulrike Prange

Fundamental Theory for Typed Attributed Graph Transformation ...... 161
  Hartmut Ehrig, Ulrike Prange, and Gabriele Taentzer

Parallel Independence in Hierarchical Graph Transformation .......... 178
  Annegret Habel and Berthold Hoffmann

Analysis and Testing

Generating Test Cases for Code Generators
by Unfolding Graph Transformation Systems .......................... 194
  Paolo Baldan, Barbara König, and Ingo Stürmer

Stochastic Graph Transformation Systems ............................. 210
  Reiko Heckel, Georgios Lajios, and Sebastian Menge

Model Checking Graph Transformations:
A Comparison of Two Approaches ..................................... 226
  Arend Rensink, Ákos Schmidt, and Dániel Varró

Graph Theory and Algorithms

Election, Naming and Cellular Edge Local Computations ............... 242
  Jérémie Chalopin, Yves Métivier, and Wiesław Zielonka

Embedding in Switching Classes with Skew Gains ...................... 257
  Andrzej Ehrenfeucht, Jurriaan Hage, Tero Harju,
  and Grzegorz Rozenberg

Synchronizers for Local Computations ................................ 271
  Yves Métivier, Mohamed Mosbah, Rodrigue Ossamy, and Afif Sellami

Application Conditions and Logic

Constraints and Application Conditions:
From Graphs to High-Level Structures ................................. 287
  Hartmut Ehrig, Karsten Ehrg, Annegret Habel,
  and Karl-Heinz Pennemann
Specification Matching of Web Services
Using Conditional Graph Transformation Rules .......................... 304
  Alexey Cherchago and Reiko Heckel

Representing First-Order Logic Using Graphs .......................... 319
  Arend Rensink

Transformation of Special Structures

Coproduct Transformations on Lattices of Closed Partial Orders .... 336
  Gemma Casas-Garriga and José L. Balcázar

Parsing String Generating Hypergraph Grammars .................... 352
  Sebastian Seifert and Ingrid Fischer

Composition of Path Transductions .................................. 368
  Tanguy Urvoy

Object-Orientation

Translating Java Code to Graph Transformation Systems ............ 383
  Andrea Corradini, Fernando Luís Dotti, Luciana Foss, and Leila Ribeiro

Extending Graph Rewriting for Refactoring .......................... 399
  Niels Van Eetvelde and Dirk Janssens

Derivations in Object-Oriented Graph Grammars .................... 416
  Ana Paula Lüdtke Ferreira and Leila Ribeiro

Tutorials and Workshops

Tutorial Introduction to Graph Transformation:
A Software Engineering Perspective ................................. 431
  Luciano Baresi and Reiko Heckel

Tutorial on DNA Computing and Graph Transformation ............ 434
  Tero Harju, Ion Petre, and Grzegorz Rozenberg

Workshop TERMGRAF 2004 ............................................ 437
  Maribel Fernández

Workshop on Graph-Based Tools ...................................... 439
  Tom Mens, Andy Schürr, and Gabriele Taentzer

Workshop on Petri Nets and Graph Transformations ................. 442
  Hartmut Ehrig, Julia Padberg, and Grzegorz Rozenberg
Workshop on Software Evolution Through Transformations:
Model-Based vs. Implementation-Level Solutions .......................... 445
   Reiko Heckel and Tom Mens

Workshop on Logic, Graph Transformations, Finite
and Infinite Structures .......................................................... 448
   Bruno Courcelle and David Janin

Author Index ................................................................. 451
