# Table of Contents

Architecture Specific Models: Software Design on Abstract Platforms  
(The P2P Case) ................................................... 1  
Egidio Astesiano, Maura Cerioli, and Gianna Reggio

Tight Structuring for Precise UML-Based Requirement Specifications  . . . 16  
Egidio Astesiano and Gianna Reggio

Integrating Performance Modeling in the Software Development Process . . 35  
Simonetta Balsamo and Marta Simeoni

The Inevitable Pain of Software Development:  
Why There Is No Silver Bullet ........................................ 50  
Daniel M. Berry

Toward Component-Oriented Formal Software Development:  
An Algebraic Approach .................................................... 75  
Michel Bidoit, Donald Sannella, and Andrzej Tarlecki

Higher Order Applicative XML Documents ............................. 91  
Peter T. Breuer, Carlos Delgado Kloos, Vicente Luque Centeno,  
and Luis Fernández Sánchez

A New Paradigm for Requirements Specification  
and Analysis of System-of-Systems .................................. 108  
Dale S. Caffall and James B. Michael

Towards Ontology Driven Software Design ............................ 122  
Paolo Ciancarini and Valentina Presutti

A Model Based Development Approach  
for Distributed Embedded Systems .................................. 137  
Frédéric Gilliers, Fabrice Kordon, and Dan Regep

Pervasive Challenges for Software Components .......................... 152  
Thomas Gschwind, Mehdi Jazayeri, and Johann Oberleitner

Model Generation for Legacy Systems .................................. 167  
Hardi Hungar, Tiziana Margaria, and Bernhard Steffen

Automatic Failures-Free Connector Synthesis: An Example .............. 184  
Paola Inverardi and Massimo Tivoli

Module Dependences in Software Design ............................... 198  
Daniel Jackson
Towards Fully Automatic Execution Monitoring .................................. 204
  Clinton Jeffery, Mikhail Auguston, and Scott Underwood

Automation of Software System Development
Using Natural Language Processing and Two-Level Grammar ........... 219
  Beum-Seuk Lee and Barrett R. Bryant

  Insup Lee, Anna Philippou, and Oleg Sokolsky

Architecture Based Model Driven Software
and System Development for Real-Time Embedded Systems .......... 249
  Bruce Lewis

A Computational Model for Complex Systems of Embedded Systems ..... 261
  Luqi, Ying Qiao, and Lin Zhang

Software Evolution as the Key to Productivity ............................. 274
  Oscar Nierstrasz

Model-Checking Complex Software – A Memory Perspective ............ 283
  Murali Rangarajan and Darren Cofer

Agile Modeling with the UML .................................................. 297
  Bernhard Rumpe

Predictable Component Architectures
Using Dependent Finite State Machines ................................. 310
  Heinz W. Schmidt, Bernd J. Krämer, Iman Poernomo,
  and Ralf Reussner

From Object Orientation to Goal Orientation:
A Paradigm Shift for Requirements Engineering ..................... 325
  Axel van Lamsweerde and Emmanuel Letier

View Consistency in Software Development ................................ 341
  Martin Wirsing and Alexander Knapp

Author Index ............................................................................. 359
