# Table of Contents

Component-Based Design of Embedded Software: An Analysis of Design Issues ........................................ 1  
*Christo Angelov, Krzysztof Sierszecki, and Nicolae Marian*

How Design Patterns Affect Application Performance – A Case of a Multi-tier J2EE Application ........................ 12  
*Jakub Rudzki*

An MDA-Based Approach for Inferring Concurrency in Distributed Systems ........................................ 24  
*Raul Silaghi and Alfred Strohmeier*

Task-Based Access Control for Virtual Organizations ............... 38  
*Panos Periorellis and Savas Parastatidis*

Self-deployment of Distributed Applications ......................... 48  
*Ichiro Satoh*

Modeling and Analysis of Exception Handling by Using UML Statecharts ........................................ 58  
*Gergely Pintér and István Majzik*

Coordinated Anonymous Peer-to-Peer Connections with MoCha . . 68  
*Juan Guillen-Scholten and Farhad Arbab*

A Survey of Software Development Approaches Addressing Dependability ........................................ 78  
*Sadaf Mustafiz and Jörg Kienzle*

FreeSoDA: A Web Services-Based Tool to Support Documentation in Distributed Projects .......................... 91  
*Frank Padberg*

A JMM-Faithful Non-interference Calculus for Java ................. 101  
*Vladimir Klebanov*

A Java Package for Transparent Code Mobility ........................ 112  
*Lorenzo Bettini*

## Keynote Talks

Dependability-Explicit Computing: Applications in e-Science and Virtual Organisations ................................ 123  
*John Fitzgerald*
Towards a Precise UML-Based Development Method ............... 124
    Gianna Reggio

Tutorials
Fault Tolerance – Concepts and Implementation Issues .............. 125
    Jörg Kienzle

Author Index .............................................................. 127
