# Table of Contents

## Invited Talk

Trends in Computing ......................................................... 1  
  *Mark E. Dean*

## Invited Paper

A Case Study in Formal Verification of Register-Transfer Logic with ACL2:  
The Floating Point Adder of the AMD Athlon™ Processor ............. 3  
  *David M. Russinoff*

## Contributed Papers

An Algorithm for Strongly Connected Component Analysis in \( n \log n \)  
Symbolic Steps .............................................................. 37  
  *Roderick Bloem, Harold N. Gabow, Fabio Somenzi*

Automated Refinement Checking for Asynchronous Processes .......... 55  
  *Rajeev Alur, Radu Grosu, Bow-Yaw Wang*

Border-Block Triangular Form and Conjunction Schedule in Image  
Computation ............................................................... 73  
  *In-Ho Moon, Gary D. Hachtel, Fabio Somenzi*

B2M: A Semantic Based Tool for BLIF Hardware Descriptions ....... 91  
  *David Basin, Stefan Friedrich, Sebastian Mödersheim*

Checking Safety Properties Using Induction and a SAT-Solver ........ 108  
  *Mary Sheeran, Satnam Singh, Gunnar Stålmarck*

Combining Stream-Based and State-Based Verification Techniques ....... 126  
  *Nancy A. Day, Mark D. Aagaard, Byron Cook*

A Comparative Study of Symbolic Algorithms for the Computation of Fair  
Cycles .............................................................................. 143  
  *Kavita Ravi, Roderick Bloem, Fabio Somenzi*

Correctness of Pipelined Machines ........................................ 161  
  *Panagiotis Manolios*

Do You Trust Your Model Checker? ......................................... 179  
  *Wolfgang Reif, Jürgen Ruf, Gerhard Schellhorn, Tobias Vollmer*

Executable Protocol Specification in ESL ................................. 197  
  *Edmund M. Clarke, S. German, Y. Lu, Helmut Veith, D. Wang*
X Table of Contents

Formal Verification of Floating Point Trigonometric Functions .......... 217
  John Harrison

Hardware Modeling Using Function Encapsulation ...................... 234

A Methodology for the Formal Analysis of Asynchronous Micropipelines . 246
  Antonio Cerone, George J. Milne

A Methodology for Large-Scale Hardware Verification .................. 263
  Mark D. Aagaard, Robert B. Jones, Thomas F. Melham,
  John W. O’Leary, Carl-Johan H. Seger

Model Checking Synchronous Timing Diagrams .......................... 283
  Nina Amla, E. Allen Emerson, Robert P. Kurshan, Kedar S. Namjoshi

Model Reductions and a Case Study .................................. 299
  Jin Hou, Eduard Cerny

Modeling and Parameters Synthesis for an Air Traffic Management System 316
  Adilson Luiz Bonifácio, Arnaldo Vieira Moura

Monitor-Based Formal Specification of PCI ........................... 335
  Kanna Shimizu, David L. Dill, Alan J. Hu

SAT-Based Image Computation with Application in Reachability Analysis 354
  Aarti Gupta, Zijiang Yang, Pranav Ashar, Anubhav Gupta

SAT-Based Verification without State Space Traversal ................. 372
  Per Bjesse, Koen Claessen

Scalable Distributed On-the-Fly Symbolic Model Checking ............. 390
  Shoham Ben-David, Tamir Heyman, Orna Grumberg, Assaf Schuster

The Semantics of Verilog Using Transition System Combinators ......... 405
  Gordon J. Pace

Sequential Equivalence Checking by Symbolic Simulation .............. 423
  Gerd Ritter

Speeding Up Image Computation by Using RTL Information ............. 443
  Christoph Meinel, Christian Stangier

Symbolic Checking of Signal-Transition Consistency for Verifying
High-Level Designs .................................................. 455
  Kiyoharu Hamaguchi, Hidekazu Urushihara, Toshinobu Kashiwabara

Symbolic Simulation with Approximate Values ........................ 470
  Chris Wilson, David L. Dill, Randal E. Bryant
A Theory of Consistency for Modular Synchronous Systems ............ 486
Randal E. Bryant, Pankaj Chauhan, Edmund M. Clarke, Amit Goel

Verifying Transaction Ordering Properties in Unbounded Bus Networks through Combined Deductive/Algorithmic Methods ............ 505
Michael Jones, Ganesh Gopalakrishnan

Visualizing System Factorizations with Behavior Tables ............... 520
Alex Tsow, Steven D. Johnson

Author Index ................................................................. 539
