

Design Patterns for Distributed Real-Time Embedded Systems
Edited by Lisa DiPippo and Chris Gill

Table of Contents

1. Introduction

Resource Management Patterns Section

2. General Resource Management Patterns (*Paul Rubel*)
 - 2.1. Reactive Resource Allocation Pattern
 - 2.2. Proactive Resource Allocation Pattern
 - 2.3. Virtual Component pattern
 - 2.4. Response Pattern
 - 2.5. Rapid Local Response
 - 2.6. Coordinated Response Pattern
 - 2.7. Local and Coordinated Response
 - 2.8. Resource Area Network Pattern
3. RM Specification and Enforcement Patterns (*Chang Liu*)
 - 3.1. Adaptation analysis Pattern
 - 3.2. Allocation optimization Pattern
 - 3.3. End-to-end allocation Pattern
 - 3.4. Qos contract Pattern
 - 3.5. Service request binding PATTERN
 - 3.6. Quality CONnector Pattern
 - 3.7. Service REQUEST MAnagement Pattern
 - 3.8. Event sequence synthesis Pattern
4. RM Monitoring Patterns (*Chris Gill*)
 - 4.1. QoS Monitoring Pattern
 - 4.2. Resource Monitoring Pattern
 - 4.3. Allocation Policing Pattern
 - 4.4. Distributed Performance Monitoring Pattern
 - 4.5. Local Performance Monitoring Pattern
 - 4.6. Resource and Process Monitoring
 - 4.7. Snapshot Pattern
 - 4.8. Failure Detection Pattern
 - 4.9. Complete Event Sequence Recording Pattern
 - 4.10. Event Sequence Coverage Pattern
5. RM Actuation Patterns (*Lisa DiPippo*)
 - 5.1. Deny Admission Pattern
 - 5.2. Activation Cancellation Pattern
 - 5.3. Resource Reallocation Pattern
 - 5.4. QoS Adjustment Pattern
 - 5.5. Resource and Process Control Pattern
 - 5.6. Request Pacing Pattern
 - 5.7. Event Sequence Execution Pattern

Scheduling Patterns Section

6. Scheduling Specification and Enforcement Patterns (*Victor Fay-Wolfe*)
 - 6.1. Upfront Analysis Pattern
 - 6.2. Planned Scheduling Pattern
 - 6.3. Share Allocation Pattern
 - 6.4. Hierarchical Scheduling
 - 6.5. Strategy Composition Pattern
 - 6.6. Static Scheduling
 - 6.7. Scenario based Scheduling
 - 6.8. Distributed Scheduling Service Pattern
7. Scheduling Actuation Patterns (*Douglas Niehaus*)
 - 7.1. Masking Interrupts Pattern
 - 7.2. Synchronous Locks Pattern
 - 7.3. Request Partition Pattern
 - 7.4. Strategic Request Reordering Pattern
 - 7.5. Request Propagation Pattern
 - 7.6. Priority Driven Scheduling Pattern
 - 7.7. Planned Scheduling Pattern
 - 7.8. Share Allocation Pattern
 - 7.9. Local Enforcement Pattern
 - 7.10. Distributed Resource Consistency Control Pattern
 - 7.11. Global to Local Priority Mapping
 - 7.12. Global Load Allocation
 - 7.13. Distributed Resource Concurrency Control
 - 7.14. Distributed Scheduling

Engineering Patterns Section

8. System Engineering Patterns (*Toni Heightland*)
 - 8.1. Real-Time System Characterization
 - 8.2. Hardware Profiling
 - 8.3. Software Profiling
 - 8.4. System Specification
 - 8.5. The DRE Aspect Pattern
9. Real-Time Data Distribution Examples (*Paul R. Work*)
10. Conclusion
