## Centre for Economic Policy Research

The Centre for Economic Policy Research is a registered charity with educational purposes. It was established in 1983 to promote independent analysis and public discussion of open economies and the relations between them. Institutional (core) finance for the Centre has been provided through major grants from the Economic and Social Research Council, the Leverhulme Trust, the Esmée Fairbairn Trust and the Bank of England. None of these organizations gives prior review to the Centre's publications nor do they necessarily endorse the views expressed therein.

The Centre is pluralist and non-partisan, bringing economic research to bear on the analysis of medium- and long-run policy questions. The research work which it disseminates may include views on policy, but the Board of Governors of the Centre does not give prior review to such publications, and the Centre itself takes no institutional policy positions. The opinions expressed in this volume are those of the authors and not those of the Centre for Economic Policy Research.

### Board of Governors

#### *Chairman*

Mr Jeremy Hardie

#### *Vice-Chairman*

Sir Adam Ridley

#### *Governors*

Dr Christopher Bliss

Mr Gavyn Davies

Admiral Sir James Eberle

Professor Frank Hahn

Ms Sarah Hogg

Ms Kate Mortimer

Sir Kit McMahon

Mr Michael Posner

Lord Richardson

Professor Amartya Sen

Professor David Stout

Mr Angus Walker

Sir Douglas Wass

### Officers

#### *Director*

Professor Richard Portes

#### *Administrative Directors*

Mrs Wendy Thompson *Programme and Finance*

Mr Stephen Yeo *Research and Publications*

1 February 1987

## vi Contents

V	Current Department of Trade and Industry policies towards Science and Technology (S&T)	43
3	The importance of technology policy	51
	HENRY ERGAS	
I	Introduction	51
II	The 'mission-oriented' countries (US, UK, and France)	53
III	The 'diffusion-oriented' countries (Germany, Switzerland and Sweden)	66
IV	Shifting and deepening: an attempt at synthesis	76
V	Policy implications	83
4	The value of patents as indicators of inventive activity	97
	ZVI GRILICHES, ARIEL PAKES and BRONWYN H. HALL	
I	Introduction	97
II	The NBER R&D data base and the growth of US firms in the 1970s	97
III	Patents and R&D	104
IV	Patents, R&D and stock market values	108
V	Patent renewal data	113
VI	The spillover effects of R&D	117
VII	Summary	119
	Appendix: The Compusat-OTAF patents match	122
5	Learning to learn, localized learning and technological progress	125
	JOSEPH E. STIGLITZ	
I	Micro-economic analysis	127
II	Macro-economic implications	134
III	Some speculative remarks	141
	Appendix	144
6	Some analytical observations on diffusion policies	154
	PAUL STONEMAN	
I	Introduction	154
II	A strategic framework	156
III	Information-based models	158
IV	Differences-based models	160
V	Diffusion and R&D	164
VI	Some qualifications	166
VII	Conclusions	167

	<b>Contents</b>	vii
7 International trade and technology policy		169
BRUCE LYONS		
I Distinctively international dimensions of technology		171
II Empirical background		173
III Transcendental technological progress		178
IV Endogenous technological progress		187
V Strategic government policies		193
VI Conclusions		197
8 Some new standards for the economics of standardization in the information age		206
PAUL A. DAVID		
I Technological standards, business strategies and public policy		206
II Network technologies, past and present		208
III Interface and other standards: a proposed taxonomy		211
IV Network externalities and interface standardization: statics		217
V Some elementary dynamics of technological systems rivalry		220
VI Three non-standard dilemmas of standardization policy – managing windows, giants and orphans		228
VII Towards a political economy of technological interface standards		234
<i>Index</i>		240

## Tables

	<i>page</i>
3.1 Share of defence-related R&D in government expenditure on R&D, 1981	54
3.2 Public funding for R&D in the high, medium and low-intensity R&D industries as respective percentages of total public funding	54
3.3 Share of government-financed R&D carried out within the government sector	58
3.4 Number of research scientists and engineers per 1,000 of the labour force, 1981	60
3.5 Diplomas giving access to higher education as percentage of age group	60
3.6 Higher education engineering qualifications	68
3.7 Percentage of a generation entering higher education	68
3.8 Distribution of students in upper secondary education (full-time and part-time enrolments) around 1980–82	69
3.9 Technology systems and industrial structures	77
4.1 The distribution of patents applied for by year of application, 1970–82, and time to year of grant	98
4.2 Statistics for the 1976 cross section: trimmed data	99
4.3 Average growth rates in the US, 1973–80, at the company and industry level	102
4.4 Patents and R&D: selected statistics associated with estimating the equation	
$\ln P_{it} = \sum_{j=0}^5 \beta_j \ln R_{it-j} + u_{it}$	105
4.5 Patents and R&D: coefficients of the within-firms equation	105
4.6 Time series analysis of log R&D	107
4.7 R&D, patents, and the stock market rate of return	110

**Tables** ix

4.8	Estimated indices of quantity, quality and total value of cohorts of patents at five-year intervals between 1955 and 1975	116
4.9	Patent equation estimation results, non-linear two-stage least squares (1976 cross section)	118
4.10	Firm sales growth as a function of conventional inputs, R&D intensity, and R&D spillover measures	119
8.1	Taxonomy of standards	214

## Figures

---

3.1	Improvements in key design parameters	<i>page</i> 79
4.1	Log of patents/assets vs log of R&D/assets	101
5.1	Labour-augmenting technical progress; all techniques affected similarly	128
5.2	Localized technological progress: no spill-overs	128
5.3	Localized technological progress: slight spill-overs	129
5.4	Multiple equilibria	136
5.5	Multiple equilibria in the life cycle model	137
5.6	Differing equilibrium growth rates	139
5.7	Learning curves	145
5.8	Steady state output = $\hat{Q}^* e^{gt}$	147
5.9	Choice of technique for given $u_1(t)$ , $u_2(t)$	148
5.10	Learning as a non-linear function of current output: $V'_2$ depends on $Q_2$	149
7.1	Strategic government policy	193
8.1	Generation of the $H$ -function	222
8.2	Basic cases in stochastic systems rivalries	224
8.3	Rational adaptive expectations reinforce the normal dynamic effects of positive network externalities	225
8.4	The 'Arthur-gram' for the (linear) increasing returns case of systems rivalry	228

## Preface

---

This volume contains the proceedings of the conference 'Economics and Technology Policy' organised by the Centre for Economic Policy Research and held in London on 1–2 September 1986.

Financial support for the conference was provided by the Department of Trade and Industry, British Telecom and the Centre for Economic Policy Research International Foundation to whom we express our gratitude. We would also like to thank Monica Allen for all her efforts to ensure the smooth running of the conference, Wendy Thompson for help in developing the conference proposal and in financial administration, Stephen Yeo for his assistance in getting this volume to press and especially John Black for all his efforts as Production Editor. In addition, on behalf of all the authors of the papers in this volume, we wish to thank the participants in the conference not only for their comments on these papers but also for their contribution to a most constructive and enjoyable event.

PAUL STONEMAN  
PARTHA DASGUPTA

## Participants

---

- Christiano Antonelli *Organization for Economic Cooperation and Development*  
John Barber *Department of Trade and Industry*  
John Black *University of Exeter*  
Jeremy Bray MP *House of Commons*  
Robin Brighton *Segal Quince Wicksteed, Consulting and Management Services, Cambridge*  
J. B. Cowie *British Telecom*  
Cathy Cunningham *Cabinet Office*  
Partha Dasgupta *St John's College, Cambridge and CEPR*  
Paul David *Stanford University*  
Giovanni Dosi *University of Sussex*  
Henry Ergas *Organization for Economic Cooperation and Development*  
Paul Geroski *University of Southampton*  
Zvi Griliches *Harvard University*  
Philip Hills *Department of Trade and Industry*  
Tom Hoehn *Malmgren, Golt, Kingston & Co.*  
Derek Howarth *Department of Trade and Industry*  
Bruce Lyons *University of East Anglia*  
Douglas McWilliams *IBM UK Ltd*  
David Mowery *Carnegie–Mellon University*  
Ariel Pakes *Harvard University*  
Keith Pavitt *University of Sussex*  
Christian Pothoff-Sewing *Unilever PLC*  
Ron Smith *Birkbeck College, London*  
Luc Soete *University of Sussex*  
Joseph Stiglitz *Princeton University*  
Paul Stoneman *University of Warwick and CEPR*  
Peter Swann *University of Bath*
