As we approach the end of the twentieth century, public and scientific attention is focusing increasingly on the detection and assessment of changes in our environment. This unique volume addresses the potential implications of global warming for fisheries and the societies which depend on them. Using a 'forecasting by analogy' approach, which draws upon experiences from the recent past in coping with regional fluctuations in the abundance or availability of living marine resources, it is shown how we might be able to assess our ability to respond to the consequences of future environmental changes induced by a potential global warming. Leading researchers and thinkers from disciplines as diverse as biology, anthropology, political science, and economics present a series of integrated case studies from around the globe to create a major work in this field.

## Contents

	Page
<b>1</b> Introduction <i>Michael H. Glantz</i> . . . . .	1
<b>2</b> King crab dethroned <i>Warren Wooster</i> . . . . .	15
<b>3</b> The rise and fall of the California sardine empire <i>Edward Ueber and Alex MacCall</i> . . . . .	31
<b>4</b> El Niño and variability in the northeastern Pacific salmon fishery: implications for coping with climate change <i>Kathleen A. Miller and David L. Fluharty</i> . . . . .	49
<b>5</b> The US Gulf shrimp fishery <i>Richard Condrey and Deborah Fuller</i> . . . . .	89
<b>6</b> The menhaden fishery: interactions of climate, industry, and society <i>Lucy E. Feingold</i> . . . . .	121
<b>7</b> Maine lobster industry <i>James M. Acheson</i> . . . . .	147
<b>8</b> Human responses to weather-induced catastrophes in a west Mexican fishery <i>James R. McGoodwin</i> . . . . .	167
<b>9</b> Irruption of sea lamprey in the upper Great Lakes: analogous events to those that may follow climate warming <i>Henry A. Regier and John L. Goodier</i> . . . . .	185
<b>10</b> North Sea herring fluctuations <i>R.S. Bailey and J.H. Steele</i> . . . . .	213
<b>11</b> Atlanto-Scandian herring: a case study <i>Andrei S. Krovnin and Sergei N. Rodionov</i> . . . . .	231
<b>12</b> Global warming impacts on living marine resources: Anglo-Icelandic Cod Wars as an analogy <i>Michael H. Glantz</i> . . . . .	261
<b>13</b> Adjustments of Polish fisheries to changes in the environment <i>Zdzislaw Russek</i> . . . . .	291

<b>14</b>	Climate-dependent fluctuations in the Far Eastern sardine population and their impacts on fisheries and society <i>Tsuyoshi Kawasaki</i> . . . . .	325
<b>15</b>	The Peru–Chile eastern Pacific fisheries and climatic oscillation <i>César N. Caviedes</i> and <i>Timothy J. Fik</i> . . . . .	355
<b>16</b>	Climate change, the Indian Ocean tuna fishery, and empiricism <i>Gary D. Sharp</i> . . . . .	377
<b>17</b>	Climate variability, climate change, and fisheries: a summary <i>Michael H. Glantz</i> and <i>Lucy E. Feingold</i> . . . . .	417
	Index . . . . .	439
