Contents

<i>Acknowledgements</i>	vii
1 The structure of matter	1
2 The strange particles	38
3 Quarks	72
4 The great accelerator hunt	97
5 The quest for the free quark	111
6 Matter and the Universe	144
<i>Index</i>	157

Acknowledgements

I acknowledge the very great help I have had from my teachers, first of all my mother and my father, then many other people. In physics I am particularly indebted to Lajos Janossy, George Rochester and Erwin Schrödinger. I have been greatly helped by my colleagues in Sydney, particularly Professors Stuart Butler, Harry Messel, Lawrence Peak and Murray Winn. I appreciate the comments and criticisms of the following who read all or part of the manuscript: Professor Luis Alvarez, Harish Briel, Carolyn Carpenter, Dorothy Carpenter, Samantha McKay and Professor Lawrence Peak.

The manuscript was typed by Ms Barbara Dunn and Mrs E. Shooks, and the drawings prepared by Ms Audrey Castleman and Mrs M. Tallon.

I thank Professor George Rochester for his two beautiful photographs of V-particles, Professor Peter Fowler for the photograph of the first τ particle decay, and Professor Alan Thorndike and other members of the Brookhaven Ω^- group for the first bubble chamber photograph of the Ω^- and the accompanying diagram.

I am indebted to Messrs A. P. Watt Ltd and Macmillan Ltd for permission to quote Sir John Squire's epigram on Einstein.
