
Contents

1	Introduction	1
1.1	Three pillar approach	1
1.2	Solvency	2
1.3	From the past to the future	4
1.4	Full balance sheet approach	4
1.5	Recent financial failures and difficulties	6
2	Stochastic discounting	7
2.1	Basic discrete time model	7
2.2	Market-consistent valuation in the basic discrete time model	9
2.2.1	Task of modelization	12
2.2.2	Understanding deflators	12
2.2.3	Toy example for deflators	14
2.3	Valuation at time $t > 0$	16
2.4	The meaning of basic reserves	18
2.5	Equivalent martingale measures	20
2.6	Technical and financial variables	24
2.7	Conclusions on Chapter 2	26
3	Valuation portfolio in life insurance	29
3.1	Deterministic life insurance model	29
3.2	Valuation portfolio for deterministic life model	30
3.3	General valuation procedure for deterministic technical risks	32
3.4	Self-financing property of the VaPo (deterministic technical risk)	33
3.5	VaPo protected against technical risks	34
3.6	Back to the basic model	39
3.7	Conclusion on Chapter 3	40
3.8	Examples	41

4	Financial risks	47
4.1	Asset liability management	47
4.2	Procedure to control financial risks	49
4.3	Financial modeling	51
4.3.1	Stochastic discounting	51
4.3.2	Modeling Margrabe options	52
4.3.3	Conclusions	53
4.4	Pricing Margrabe options	53
4.4.1	Pricing using Esscher transforms	54
4.4.2	Application of the Esscher transform to the multi-dimensional Wiener process	57
4.4.3	Hedging Margrabe options	59
4.4.4	Risk bearing capital	61
5	Valuation portfolio in non-life insurance	63
5.1	Introduction	63
5.2	Construction of the VaPo	66
5.3	VaPo protected against technical risks, pragmatic approach	68
5.4	VaPo protected against technical risks, theoretical considerations	70
5.5	Loss development triangles	73
5.5.1	Definitions	73
5.5.2	Chain-ladder method	76
5.5.3	Estimation of the technical risks in the chain-ladder model, single accident year	83
5.5.4	Aggregation of parameter risks across different accident years	93
5.6	Unallocated loss adjustment expenses	97
5.6.1	Motivation	97
5.6.2	Pure claims payments	98
5.6.3	ULAE charges	99
5.6.4	New York-method	100
5.6.5	Example	104
5.7	Conclusion on the non-life VaPo	104
6	Selected Topics	107
6.1	Sources of losses and profits, profit sharing	107
6.2	Remarks on the self-financing property	109
6.3	Legal quote in life insurance	111
	References	115
