Preface

The recent developments in dynamic cardiac imaging and modeling are the result of an increasingly fruitful cooperation between theoreticians, engineers, and practitioners. The standard clinical parameters are progressively benefitting from more accurate quantitative measurements thanks to a simultaneous use of sophisticated data acquisition techniques such as multichannel ECG and MEG, dynamic US, doppler, X-Ray, CT, helical CT, MRI, fMRI, SPECT, PET... data and advanced physical and mathematical tools. It is becoming possible to efficiently combine prior anatomical and functional knowledge with advanced 3D spatio-temporal digital data. The challenge now is clearly to correlate the micro structure and function of the organ from the cellular level with its macroscopic functional behavior.

The FIMH 2001 international workshop aimed to promote collaboration between scientists in signal and image processing, applied mathematics and physics, biomedical engineering and computer science, and experts in cardiology, radiology, biology, and physiology. The FIMH 2001 workshop, in its first year, focused on complex heart models involving anatomical and functional information. The goal is to gradually move toward hybrid 3D biomechanical and electrophysiological models able to simulate the dynamic behavior of the heart.

We feel that FIMH 2001 presented an opportunity to create a cardio-vascular research network at a European level to federate the main pluridisciplinary groups involved in advanced research in cardiovascular imaging and modeling in Europe. The idea is to create what could be called the "European Beating Heart Project". The purpose of such a project is to join research efforts to improve diagnosis and therapy of pathological dysfunctions of the heart, for the benefit of the patient, through fundamental and clinical research.

September 2001

Toivo Katila Isabelle E. Magnin

Acknowledgements

The members of the program committee deserve special thanks for their job in reviewing all the papers, and for their support in the organization of the conference.

We thank the members of the CREATIS unit in Lyon and the Laboratory of Biomedical Engineering in Helsinki for their involvement and support in the organization of this conference.

Conference supported by

Institut National des Sciences Appliquées de Lyon (INSA), France Helsinki University of Technology (HUT), Finland Centre National de la Recherche Scientifique (CNRS), France Science Academy of Finland Joint incentive action "Beating Heart" of the CNRS, France French Cultural Center, Helsinki French-Finnish Association for Scientific and Technical Research (AFFRST) French Biomedical Engineering Society (SFGBM)

Organization

FIMH 2001 was co-organized by the CREATIS Laboratory, CNRS UMR 5515, Lyon, France, and the Laboratory of Biomedical Engineering at the Helsinski University of Technology, Finland.

Conference Chairs

Toivo Katila	Laboratory of Biomedical Engineering, Hel-
	sinski University of Technology, Finland
Isabelle E. Magnin	CREATIS, CNRS UMR 5515, Lyon, France

Organization Committee

Patrick Clarysse	CREATIS, CNRS UMR 5515, Lyon, France
Johan Montagnat	CREATIS, CNRS UMR 5515, Lyon, France
Jukka Nenonen	Laboratory of Biomedical Engineering, Hel-
	sinski University of Technology, Finland

Program Committee

T. Arts	University of Technology of Eindhoven, The
	Netherlands
N. Ayache	INRIA Sophia-Antipolis, France
S. Baillet	La Pitié Salpétrière, Paris, France
M. Barlaud	I3S, Sophia-Antipolis, France
L. Bidaut	Hôpitaux Universitaires de Genève, Switzer-
	land
B. Bijnens	MIC, Katholieke Universiteit Leuven, Belgium
I. Bloch	ENST, Paris, France
E. Canet	CREATIS, Lyon, France
P. Clarysse	CREATIS, Lyon, France
L. Cohen	CEREMADE, Paris, France
P. Croisille	CREATIS, Lyon, France
J. Declerck	OMIA, Oxford, United Kingdom
H. Delingette	INRIA Sophia-Antipolis, France
J. D'hooge	MIC, Katholieke Universiteit Leuven, Belgium
R. Fenici	Catholic University of Rome, Italy
D. Friboulet	CREATIS, Lyon, France
A. Herment	INSERM U494, Paris, France
M. Horacek	Dalhousie University, Canada
M. Janier	CREATIS, Lyon, France
H. Larson	Hvidovre Hospital, Denmark
K. Lauerma	Helsinki University Central Hospital, Finland
