

Preface

Database research and development has been remarkably successful over the past three decades. Now the field is facing new challenges posted by the rapid advances of technology, especially the penetration of the Web and Internet into everyone's daily life. The economical and financial environment where database systems are used has been changing dramatically. In addition to being able to efficiently manage a large volume of operational data generated internally, the ability to manage data in cyberspace, extract relevant information, and discover knowledge to support decision making is critical to the success of any organization. In order to provide researchers and practitioners with a forum to share their experiences in tackling problems in managing and using data, information, and knowledge in the age of the Internet and Web, the First International Conference on Web-Age Information Management (WAIM 2000) was held in Shanghai, China, June 21-23.

The inaugural conference in its series was well received. Researchers from 17 countries and regions, including Austria, Australia, Bahrain, Canada, China, France, Germany, Japan, Korea, Malaysia, The Netherlands, Poland, Singapore, Spain, Taiwan, UK, and USA submitted their recent work. Twenty-seven regular and 14 short papers contained in these proceedings were presented during the two-day conference. These papers cover a large spectrum of issues, from classical data management such as object-oriented modeling, spatial and temporal databases to recent hits like data mining, data warehousing, semi-structured data, and XML. More importantly, there are also sections of papers devoted to related research areas, such as information retrieval, artificial intelligent agents, and electronic commerce, which broaden the scope of the conference to cover the entire process of data management, information retrieval and dissemination, knowledge discovery, and applications with the Internet as the media.

Any successful conference requires tremendous efforts from numerous people. In addition to the people in various conference organization committees, we would like to thank ACM SIGMOD who supported the conference from its planning stage and granted it the in-cooperation status. We are grateful to our sponsors, in particular the K. C. Wong Education Foundation, Hong Kong, for their generous support.

June 2000

Hongjun Lu, Aoying Zhou

Conference Organization

General Chairs:

Rakesh Agrawal *IBM Almaden Research Center, USA*
Baile Shi *Fudan University, China*

Program Committee Chairs:

Hongjun Lu *Hong Kong University of Science and Technology, China*
Aoying Zhou *Fudan University, China*

Organizing Committee Chairs:

Shoucai He *Shanghai No.2 University of Technology, China*
Jinhai Chen *Fudan University, China*

Publicity Chairs:

X. Sean Wang *George Mason University, USA*
Yujun Wang *Fudan University, China*

Local Arrangement:

Jiajin Le *China Textile University*
Yangyong Zhu *Shanghai Computer Society, China*

Program Committee:

Arbee Chen *National Tsing Hua University, Taiwan*
Chen Guoqing *Tsinghua University, China*
Ming-Syan Chen *National Taiwan University, Taiwan*
David W. Cheung *Hong Kong University, China*
Umeshwar Dayal *Hewlett-Packard Laboratories, USA*
Guozhu Dong *Wright State University, USA*
Martin Ester *University of Munich, Germany*
Feng Yucai *Huazhong University of Science and Technology, China*
Johannes Gehrke *Cornell University, USA*
Stephane Grumbach *INRIA, France*
Jiawei Han *Simon Fraser University, Canada*
He Xingui *Beijing Institute of System Engineering, China*
Kamal Karlapalem *Hong Kong University of Science and Technology, China*
Masaru Kitsuregawa *University of Tokyo, Japan*
Chiang Lee *National Cheng-Kung University, Taiwan*
Qing Li *City University of Hong Kong, China*
Jianzhong Li *Harbin Institute of Technology, China*
Li Zhanhuai *Northwestern Polytechnical University, China*
Tok Wang Ling *National University of Singapore, Singapore*
Alberto Mendelzon *University of Toronto, Canada*
Mukesh Mohania *University of South Australia, Australia*

VIII Conference Organization

Shojiro Nishio	<i>Osaka University, Japan</i>
Ooi Beng Chin	<i>National University of Singapore, Singapore</i>
Maria E. Orłowska	<i>University of Queensland, Australia</i>
Michael Papazoglou	<i>Tilburg University, The Netherlands</i>
Qu Zhaorong	<i>East China Institute of Computer Technology, China</i>
Ming-Chien Shan	<i>Hewlett-Packard Laboratories, USA</i>
Jianwen Su	<i>University of California at Santa Barbara, USA</i>
Zhao-Hui Tang	<i>Microsoft, USA</i>
Tang Changjie	<i>Sichuan University, China</i>
Tang Shiwei	<i>Peking University, China</i>
Tian Zengping	<i>Fudan University, China</i>
Tong Fu	<i>Shanghai University, China</i>
X. Sean Wang	<i>George Mason University, USA</i>
Wang Shan	<i>Renmin University of China, China</i>
Kyu-Young Whang	<i>KAIST, Korea</i>
Wong Lim Soon	<i>Kent Ridge Digital Laboratories, Singapore</i>
Xu Jiepan	<i>Nanjing University, China</i>
Jian Yang	<i>CSIRO, Australia</i>
Jeffrey X. Yu	<i>Chinese University of Hong Kong, China</i>
Philip S. Yu	<i>IBM T.J. Watson Research Center, USA</i>
Yu Ge	<i>Northeastern University, China</i>
Yanchun Zhang	<i>University of Southern Queensland, Australia</i>
J. Leon Zhao	<i>University of Arizona, USA</i>
Zhou Lizhu	<i>Tsinghua University, China</i>
Zhou Longxiang	<i>China Academy of Science, China</i>

The First International Conference on Web-Age Information Management was organized by

Fudan University, China

in cooperation with

ACM SIGMOD

Shanghai Computer Society

and sponsored by

K.C. Wong Education Foundation, Hong Kong
