

Foreword

ETAPS 2003 was the sixth instance of the European Joint Conferences on Theory and Practice of Software. ETAPS is an annual federated conference that was established in 1998 by combining a number of existing and new conferences. This year it comprised five conferences (FOSSACS, FASE, ESOP, CC, TACAS), 14 satellite workshops (AVIS, CMCS, COCV, FAMAS, Feyerabend, FICS, LDTA, RSKD, SC, TACoS, UniGra, USE, WITS and WOOD), eight invited lectures (not including those that are specific to the satellite events), and several tutorials. We received a record number of submissions to the five conferences this year: over 500, making acceptance rates fall below 30% for every one of them. Congratulations to all the authors who made it to the final program! I hope that all the other authors still found a way of participating in this exciting event and I hope you will continue submitting.

A special event was held to honour the 65th birthday of Prof. Wlad Turski, one of the pioneers of our young science. The deaths of some of our “fathers” in the summer of 2002 — Dahl, Dijkstra and Nygaard — reminded us that Software Science and Technology is, perhaps, no longer that young. Against this sobering background, it is a treat to celebrate one of our most prominent scientists and his lifetime of achievements. It gives me particular personal pleasure that we are able to do this for Wlad during my term as chairman of ETAPS.

The events that comprise ETAPS address various aspects of the system development process, including specification, design, implementation, analysis and improvement. The languages, methodologies and tools which support these activities are all well within its scope. Different blends of theory and practice are represented, with an inclination towards theory with a practical motivation on the one hand and soundly based practice on the other. Many of the issues involved in software design apply to systems in general, including hardware systems, and the emphasis on software is not intended to be exclusive.

ETAPS is a loose confederation in which each event retains its own identity, with a separate program committee and independent proceedings. Its format is open-ended, allowing it to grow and evolve as time goes by. Contributed talks and system demonstrations are in synchronized parallel sessions, with invited lectures in plenary sessions. Two of the invited lectures are reserved for “unifying” talks on topics of interest to the whole range of ETAPS attendees. The aim of cramming all this activity into a single one-week meeting is to create a strong magnet for academic and industrial researchers working on topics within its scope, giving them the opportunity to learn about research in related areas, and thereby to foster new and existing links between work in areas that were formerly addressed in separate meetings.

ETAPS 2003 was organized by Warsaw University, Institute of Informatics, in cooperation with the Foundation for Information Technology Development, as well as:

- European Association for Theoretical Computer Science (EATCS);
- European Association for Programming Languages and Systems (EAPLS);

- European Association of Software Science and Technology (EASST); and
- ACM SIGACT, SIGSOFT and SIGPLAN.

The organizing team comprised:

Mikołaj Bojańczyk, Jacek Chrząszcz, Piotr Chrząstowski-Wachtel, Grzegorz Grudziński, Kazimierz Grygiel, Piotr Hoffman, Janusz Jabłonowski, Mirosław Kowaluk, Marcin Kubica (publicity), Sławomir Leszczyński (www), Wojciech Moczydłowski, Damian Niwiński (satellite events), Aleksy Schubert, Hanna Sokołowska, Piotr Stańczyk, Krzysztof Szafran, Marcin Szczuka, Łukasz Sznuk, Andrzej Tarlecki (co-chair), Jerzy Tiuryn, Jerzy Tyszkiewicz (book exhibition), Paweł Urzyczyn (co-chair), Daria Walukiewicz-Chrząszcz, Artur Zawłocki.

ETAPS 2003 received support from:¹

- Warsaw University
- European Commission, High-Level Scientific Conferences and Information Society Technologies
- US Navy Office of Naval Research International Field Office,
- European Office of Aerospace Research and Development, US Air Force
- Microsoft Research

Overall planning for ETAPS conferences is the responsibility of its Steering Committee, whose current membership is:

Egidio Astesiano (Genoa), Pierpaolo Degano (Pisa), Hartmut Ehrig (Berlin), José Fiadeiro (Leicester), Marie-Claude Gaudel (Paris), Evelyn Duesterwald (IBM), Hubert Garavel (Grenoble), Andy Gordon (Microsoft Research, Cambridge), Roberto Gorrieri (Bologna), Susanne Graf (Grenoble), Görel Hedin (Lund), Nigel Horspool (Victoria), Kurt Jensen (Aarhus), Paul Klint (Amsterdam), Tiziana Margaria (Dortmund), Ugo Montanari (Pisa), Mogens Nielsen (Aarhus), Hanne Riis Nielson (Copenhagen), Fernando Orejas (Barcelona), Mauro Pezzè (Milano), Andreas Podelski (Saarbrücken), Don Sannella (Edinburgh), David Schmidt (Kansas), Bernhard Steffen (Dortmund), Andrzej Tarlecki (Warsaw), Igor Walukiewicz (Bordeaux), Herbert Weber (Berlin).

I would like to express my sincere gratitude to all of these people and organizations, the program committee chairs and PC members of the ETAPS conferences, the organizers of the satellite events, the speakers themselves, and Springer-Verlag for agreeing to publish the ETAPS proceedings. The final votes of thanks must go, however, to Andrzej Tarlecki and Paweł Urzyczyn. They accepted the risk of organizing what is the first edition of ETAPS in Eastern Europe, at a time of economic uncertainty, but with great courage and determination. They deserve our greatest applause.

Leicester, January 2003

José Luiz Fiadeiro
ETAPS Steering Committee Chair

Preface

The present volume contains the proceedings of the international conference *Foundations of Software Science and Computation Structures (FOSSACS) 2003*, held in Warsaw, Poland, April 7–9, 2003. FOSSACS is an event of the *Joint European Conferences on Theory and Practice of Software (ETAPS)*. The previous five FOSSACS conferences took place in Lisbon (1998), Amsterdam (1999), Berlin (2000), Genoa (2001), and Grenoble (2002).

FOSSACS presents original papers on foundational research with a clear significance to software science. The Program Committee invited papers on theories and methods to support the analysis, integration, synthesis, transformation, and verification of programs and software systems. We identified the following topics, in particular: algebraic models; automata and language theory; behavioural equivalences; categorical models; computation processes over discrete and continuous data; computation structures; logics of programs; modal, spatial, and temporal logics; models of concurrent, reactive, distributed, and mobile systems; process algebras and calculi; semantics of programming languages; software specification and refinement; transition systems; and type systems and type theory. We received 96 submissions, of which 2 were withdrawn.

This proceedings consists of 27 papers. The first—*A Game Semantics for Generic Polymorphism*—accompanies the invited lecture by Samson Abramsky, University of Oxford. The remaining 26 were selected for publication by the Program Committee during a week-long electronic discussion.

I sincerely thank all the authors of papers submitted to FOSSACS 2003; the number and the quality of papers were exceptionally high this year. Moreover, I would like to thank all the members of the Program Committee for the excellent job they did during a rather demanding selection process, and to thank all our subreferees for their invaluable contributions to this process.

To administer submission and evaluation of papers, we relied on a fine web-based tool provided by METAFrames Technologies, Dortmund; thanks to Martin Karsseit and Tiziana Margaria of METAFrames for their timely support. Finally, thanks are due to the ETAPS 2003 Organizing Committee chaired by Andrzej Tarlecki and Paweł Urzyczyn and to the ETAPS Steering Committee for their efficient coordination of all the activities leading up to FOSSACS 2003.

Program Committee

Witold Charatonik (Germany and Poland)	Mogens Nielsen (Denmark)
Adriana Compagnoni (USA)	Flemming Nielson (Denmark)
Vincent Danos (France)	Francesco Parisi Presicce (Italy)
Andrew D. Gordon (UK, Chair)	Dusko Pavlovic (USA)
Roberto Gorrieri (Italy)	François Pottier (France)
Marta Kwiatkowska (UK)	P.S. Thiagarajan (Singapore)
Eugenio Moggi (Italy)	Igor Walukiewicz (France)
Uwe Nestmann (Switzerland)	Pierre Wolper (Belgium)

Referees

Samson Abramsky	Vincent Cremet
Luca Aceto	David Cyrluk
Thorsten Altenkirch	Ferruccio Damiani
Patrick Baillot	Olivier Danvy
Franco Barbanera	Rocco De Nicola
Gilles Barthe	Josee Desharnais
Andrej Bauer	Razvan Diaconescu
Nick Benton	Catalin Dima
Martin Berger	Theo Dimitrakos
Marco Bernardo	Andreas Dolzmann
Paul Blain-Levy	Gilles Dowek
Eduardo Bonelli	Jacques Duparc
Marcello Bonsangue	Zoltan Esik
Johannes Borgström	Jérôme Feret
Alexis-Julien Bouquet	Maribel Fernández
Julian Bradfield	Maria Ferreira
Mario Bravetti	Andrzej Filinski
Sebastien Briaes	Jean-Christophe Filliâtre
Antonio Bucciarelli	Marcelo Fiore
Mikael Buchholtz	Fabien Fleutot
Michele Bugliesi	Riccardo Focardi
Nadia Busi	Martin Fränzle
Luis Caires	Roberto Giacobazzi
Luca Cardelli	Jean Goubault-Larrecq
Franck Cassez	Erich Grädel
Pietro Cenciarelli	Maria Grazia Vigliotti
Tom Chothia	Martin Grohe
Serafino Cicerone	Dimitar Guelev
Alessandro Coglio	Michael Hansen
Ernie Cohen	Anne Haxthausen
Flavio Corradini	Matthew Hennessy
