

Preface

This volume contains papers selected for presentation at the *5th IAPR Workshop on Document Analysis Systems (DAS 2002)* in Princeton, NJ on August 19–21, 2002. As such, it represents the contributions of an international community of academic, industrial, and government researchers and reflects the state of the art in such diverse domains as character recognition and classifier design, text segmentation, table understanding, page layout analysis, and document engineering, indexing, and retrieval, along with emerging application areas including the World-Wide Web, where algorithms developed for “traditional” paper documents take their place alongside completely new techniques.

DAS 2002 continues in the fine tradition of past workshops held in Kaiserslautern, Germany (1994), Malvern, PA (1996), Nagano, Japan (1998), and Rio de Janeiro, Brazil (2000). DAS is distinguished from other gatherings of document analysis researchers by its emphasis on systems. To extract useful information from a noisy page image is a complex process requiring multiple stages, each of which is a research topic in its own right. The integration of such components introduces additional complications. Hence, building and testing document analysis systems is a challenging task for which no definitive solution yet exists. You will find that the papers in this volume carry with them a “flavor” that is unique to DAS.

The 44 regular and 14 short papers that appear herein derive from 15 different countries, highlighting the international make-up of our discipline. Regular papers were subjected to rigorous review by members of the Program Committee as well as other noted researchers. Short papers were chosen by the Co-Chairs for their relevance to the themes of the workshop.

We would like to thank the reviewers for their diligence, the members of the Program Committee and past DAS chairs for their support, and Larry Spitz, in particular, for his encouragement. We also wish to acknowledge the generous financial assistance of Avaya Labs, as well as that of Yasuaki Nakano, Co-Chair of DAS 1998. Lastly, we offer our gratitude to Princeton University for making its first-rate facilities available to DAS 2002.

June 2002

Daniel Lopresti
Jianying Hu
Ramanujan Kashi

Organization

Workshop Co-chairs

Daniel Lopresti	Bell Labs, Lucent Technologies, USA
Jianying Hu	Avaya Labs Research, USA
Ramanujan Kashi	Avaya Labs Research, USA

Program Committee

Apostolos Antonacopoulos	Univ. of Liverpool, UK
Henry Baird	Palo Alto Research Center, USA
Mohamed Cheriet	ETS, Canada
Andreas Dengel	DFKI, Germany
David Doermann	Univ. of Maryland, USA
Dov Dori	Technion, Israel and MIT, USA
Andrew Downton	Univ. of Essex, UK
Floriana Esposito	Univ. of Bari, Italy
Hironichi Fujisawa	Hitachi CRL, Japan
Robert M. Haralick	City Univ. of New York, USA
Tin Kam Ho	Bell Labs, Lucent Technologies, USA
Jonathan Hull	Ricoh CRC, USA
Matthew Hurst	WhizBang! Labs, USA
Sebastiano Impedovo	Univ. of Bari, Italy
Rolf Ingold	Univ. of Fribourg, Switzerland
Junichi Kanai	Panasonic Technologies, USA
Seong-Whan Lee	Korea Univ., Korea
Nabeel Murshed	Univ. of Parana, Brazil
Masaki Nakagawa	Tokyo Univ. of Agri. and Tech., Japan
Lambert Schomaker	Rijksuniversiteit Groningen, The Netherlands
Larry Spitz	Document Recognition Technologies, USA
Sargur Srihari	State Univ. of New York at Buffalo, USA
George Thoma	National Library of Medicine, USA
Karl Tombre	LORIA-INPL, France
Luc Vincent	LizardTech, USA

Additional Referees

Stephan Baumann	Thomas Kieninger	Donato Malerba
Yeongwoo Choi	Bertin Klein	Raffaele Modugno
Markus Ebbecke	Stefan Klink	Pasquale Lops
Stefano Ferilli	Wenyin Liu	Anna Salzo
Katherine Guo	Maria Grazia Lucchese	Lucia Sarcinella
Hee-Jong Kang	Matthew Ma	

Sponsoring Institution

Avaya Inc., Basking Ridge, NJ, USA
