

Preface

This volume contains the 66 contributed papers and abstracts of the three invited lectures presented at the 11th Annual European Symposium on Algorithms (ESA 2003), held in Budapest, September 16–19, 2003. The papers in each section of the proceedings are arranged alphabetically. The three distinguished invited speakers were Bernard Chazelle, Roberto Tamassia, and Éva Tardos.

For the second time, ESA had two tracks, with separate program committees, which dealt respectively with:

- ★ The design and mathematical analysis of algorithms (the “Design and Analysis” track);
- ★ Real-world applications, engineering, and experimental analysis of algorithms (the “Engineering and Applications” track).

Previous ESAs were held at Bad Honnef, Germany (1993); Utrecht, The Netherlands (1994); Corfu, Greece (1995); Barcelona, Spain (1996); Graz, Austria (1997); Venice, Italy (1998); Prague, Czech Republic (1999); Saarbrücken, Germany (2000); Århus, Denmark (2001), and Rome, Italy (2002). The predecessor to the Engineering and Applications track of ESA was the annual Workshop on Algorithm Engineering (WAE). Previous WAEs were held in Venice, Italy (1997), Saarbrücken, Germany (1998), London, UK (1999), Saarbrücken, Germany (2000), Århus, Denmark (2001), and Rome, Italy (2002).

The proceedings of the previous ESAs were published as Springer-Verlag’s LNCS volumes 726, 855, 979, 1284, 1461, 1643, 1879, 2161, and 2461. The proceedings of the WAEs from 1999 onwards were published as Springer-Verlag’s LNCS volumes 1668, 1982, and 2141.

Papers were solicited in all areas of algorithmic research, including but not limited to: computational biology, computational finance, computational geometry, databases and information retrieval, external-memory algorithms, graph and network algorithms, graph drawing, machine learning, network design, on-line algorithms, parallel and distributed computing, pattern matching and data compression, quantum computing, randomized algorithms, and symbolic computation. The algorithms could be sequential, distributed, or parallel. Submissions were strongly encouraged in the areas of mathematical programming and operations research, including: approximation algorithms, branch-and-cut algorithms, combinatorial optimization, integer programming, network optimization, polyhedral combinatorics, and semidefinite programming.

Each extended abstract was submitted to one of the two tracks. The extended abstracts were read by at least three referees each, and evaluated on their quality, originality, and relevance to the symposium. The program committees of both tracks met at the Università degli Studi “Roma Tre”, on May 23rd and 24th. The Design and Analysis track selected for presentation 46 out of the 119 submitted abstracts. The Engineering and Applications track selected for presentation 20

authors of the best student paper at ESA 2003. The winners of this prize were Mohammad Mahdian and Martin Pál for their paper *Universal Facility Location*.

Uri Zwick would like to thank Yedidyah Bar-David and Anat Lotan for their assistance in handling the submitted papers and assembling these proceedings.

We hope that this volume offers the reader a representative selection of some of the best current research on algorithms.

July 2003

Giuseppe Di Battista and Uri Zwick

Reviewers

We would like to thank the reviewers for their timely and invaluable contribution.

Dimitris Achlioptas	Graham Cormode	Alexander Hall
Udo Adamy	Péter Csorba	Magnús M. Halldórsson
Pankaj Agarwal	Ovidiu Daescu	Dan Halperin
Steve Alpern	Mark de Berg	Eran Halperin
Sai Anand	Camil Demetrescu	Sariel Har-Peled
Richard Anderson	Olivier Devillers	Jason Hartline
David Applegate	Walter Didimo	Tzvika Hartman
Claudio Arbib	Martin Dyer	Stephan Held
Aaron Archer	Alon Efrat	Michael Hoffmann
Lars Arge	Robert Elsässer	Philip Holman
Georg Baier	Lars Engebretsen	Cor Hurkens
Euripides Bampis	David Eppstein	Thore Husfeldt
Arye Barkan	Péter L. Erdős	Piotr Indyk
Amotz Barnoy	Torsten Fahle	Kamal Jain
Rene Beier	Dror Feitlson	David Johnson
András Benczúr	Rainer Feldmann	Tomasz Jurdziński
Petra Berenbrink	Kaspar Fischer	Juha Kaerkkäinen
Alex Berg	Matthias Fischer	Kostantinos Kakoulis
Marcin Bieńkowski	Aleksei Fishkin	Przemysława Kanarek
Philip Bille	Tamás Fleiner	Lutz Kettner
Markus Bläser	Lisa Fleischer	Sanjeev Khanna
Avrim Blum	Luca Forlizzi	Samir Khuller
Hans Bodlaender	Alan Frieze	Marcin Kik
Ulrich Brenner	Stefan Funke	Georg Kliewer
Gerth Stølting Brodal	Martin Gairing	Ekkehard Köhler
Adam Buchsbaum	Rajiv Gandhi	Jochen Könemann
Stefan Burkhardt	Maciej Gębala	Guy Kortsarz
John Byers	Bert Gerards	Miroslaw Korzeniowski
Gruia Calinescu	Joachim Giesen	Sven Oliver Krumke
Hana Chockler	Roberto Grossi	Daniel Kucner
David Cohen-Steiner	Sven Grothklags	Stefano Leonardi

out of the 46 submitted abstracts. The program committees of the two tracks consisted of:

Design and Analysis Track

Yair Bartal	(Hebrew University, Jerusalem)
Jean-Daniel Boissonnat	(INRIA Sophia Antipolis)
Moses Charikar	(Princeton University)
Edith Cohen	(AT&T Labs – Research, Florham Park)

ESA 2003 was held along with the third Workshop on Algorithms in Bioinformatics (WABI 2003), a workshop on Algorithmic Methods and Models for Optimization of RailwayS (ATMOS 2003), and the first Workshop on Approximation and Online Algorithms (WAOA 2003) in the context of the combined conference ALGO 2003. The organizing committee of ALGO 2003 consisted of:

János Csirik (Chair)
Csanád Imreh

both from the University of Szeged.

ESA 2003 was sponsored by EATCS (the European Association for Theoretical Computer Science), the Hungarian Academy of Science, the Hungarian National Foundation of Science, and the Institute of Informatics of the University of Szeged. The EATCS sponsorship included an award of EUR 500 for the
