

Landolt-Börnstein
Group IV: Physical Chemistry

Volume 1
Densities of Liquid Systems

Subvolume A
Nonaqueous Systems and Ternary Aqueous Systems

Title Page, Preface, Arrangement of Compounds, Symbols

1	Densities of nonaqueous systems (R. LACMANN)	1
1.1	Introduction	1
1.2	Nonaqueous systems of two inorganic components	9
1.3	Nonaqueous systems of one inorganic and one organic component (arranged according to the inorganic component)	24
1.4	Nonaqueous systems of two organic components	111
1.4.1	C-H compounds	111
1.4.2	C-H-halogen compounds	142
1.4.3	C-H-O compounds	204
1.4.4	C-H-O-halogen compounds	363
1.4.5	Organic sulphur compounds	386
1.4.6	Organic compounds with Se or Te	395
1.4.7	C-H-N compounds	396
1.4.8	C-H-halogen-N compounds	453
1.4.9	C-H-N-O compounds	461
1.4.10	C-H-N-O-halogen compounds	520
1.4.11	Organic compounds with N and S, Se or Te	525
1.4.12	Organic compounds with P, As, Sb or Bi	533
1.4.13	Organic compounds with Si	535
1.4.14	Organic compounds with B	537
1.4.15	Organometallic compounds	539
1.5	Nonaqueous systems of three or more components	546
1.6	Index for 1	561
2	Densities of ternary and polynary aqueous systems (C. SYNOWIETZ)	656
2.1	Introduction	656
2.2	Inorganic-inorganic systems containing water	658
2.3	Inorganic-organic systems containing water	688
2.4	Organic-organic systems containing water	705
