

# Volume II/20: Molecular Constants Mostly from Infrared Spectroscopy

Editor: G. Guelachvili

## Subvolume b2 $\alpha$ : Linear Triatomic Molecules: CO<sub>2</sub>(OCO)

Authors: G. Guelachvili, K. Narahari Rao

1997. LXI, 415 pages. ISBN 3-540-58852-3

### Contents

#### Introduction

|         |  |         |
|---------|--|---------|
| I       | Energy level designations  | IX      |
| II      | Effective Hamiltonians   | X       |
| II.1    | Energy matrix  | X       |
| II.1.1  | Diagonal elements  | X       |
| II.1.2  | Off-diagonal elements  | XII     |
| II.2    | Energy expressions referred to the ground state                              | XII     |
| II.2.1  | Vibrational states   | XIII    |
| II.2.2  | Rotational states  | XIII    |
| II.3    | Conversion table for energy-related units and selected fundamental constants | XIV     |
| III     | Formulas for determining rotational constants                                | XV      |
| III.1   | Effective parameters   | XV      |
| III.2   | Band center and band origin  | XVI     |
| III.3   | Comments on BHO (HBO) (see Chap. 6 of subvolume II/20b1)                     | XVII    |
| III.4   | Some specifics related to COS (OCS) (see Chap. 38 of subvolume II/20b1)      | XVIII   |
| III.4.1 | Diagonalizing the energy matrix  | XVIII   |
| III.4.2 | Effective molecular parameters   | XVIII   |
| III.4.3 | Unperturbed vibrational states   | XIX     |
| III.4.4 | Effects of perturbations   | XIX     |
| III.5   | Quadrupole coupling  | XXI     |
| IV      | Potential energy function (PEF)  | XXI     |
| IV.1    | PEF expanded as a Taylor series  | XXI     |
| IV.2    | Curvilinear valence coordinates and Morse functions                          | XXII    |
| IV.3    | Dimensionless normal coordinates   | XXII    |
| IV.4    | Specific forms of the PEF  | XXII    |
| V       | Dipole moment  | XXIV    |
| V.1     | General equations  | XXIV    |
| V.2     | Specifics related to COS (OCS) (see Chap. 38 of subvolume II/20b1)           | XXV     |
| VI      | Intensities  | XXVII   |
| VI.1    | Intensities of spectral lines  | XXVII   |
| VI.2    | Integrated absorption intensities  | XXVII   |
| VI.3    | Total internal partition sum   | XXIX    |
| VI.4    | <i>F</i> -factors (Herman-Wallis factors)                                    | XXIX    |
| VI.5    | Intensity expressions  | XXX     |
| VI.6    | Intensity units and conversion table   | XXXI    |
| VI.7    | Line profiles  | XXXVIII |
| VI.7.1  | Lorentz profile  | XXXVIII |
| VI.7.2  | Doppler profile  | XXXVIII |
| VI.7.3  | Voigt profile  | XXXVIII |
| VI.7.4  | Galatry profile  | XXXIX   |
| VI.8    | Miscellaneous topics   | XXXIX   |
| VI.8.1  | Some definitions related to collisions                                       | XXXIX   |
| VI.8.2  | Foreign gas broadening   | XXXIX   |
| VI.8.3  | Line coupling  | XL      |

|                           |  |                               |
|---------------------------|--|-------------------------------|
| VI.8.4                    | Temperature dependence of broadening   | XL                            |
| VI.9                      | Einstein coefficient of spontaneous emission   | XLI                           |
| VI.10                     | Rotational state transfer  | XLI                           |
| VII                       | Renner-Teller effect (some aspects)  | XLII                          |
| VIII                      | Some functional relations specially applicable to the molecular constants of CO <sub>2</sub>   | XLIV                          |
| VIII.1                    | Designations of the energy levels of CO <sub>2</sub>   | XLIV                          |
| VIII.2                    | Resonances in CO <sub>2</sub>  | XLIV                          |
| VIII.3.1                  | Potential-energy function (PEF)  | XLVIII                        |
| VIII.3.2                  | Interaction potential  | XLVIII                        |
| VIII.4.1                  | Dipole moment  | XLVIII                        |
| VIII.4.2                  | Transition dipole moment   | XLIX                          |
| VIII.5                    | HITELOR (High Temperature Low Resolution data base)  | XLIX                          |
| VIII.6                    | Line mixing  | XLIX                          |
| VIII.7                    | Several functional relations in which effects of collisions are included   | LI                            |
| VIII.7.1                  | Collisional broadening   | LI                            |
| VIII.7.2                  | Binary absorption coefficient  | LI                            |
| VIII.7.3                  | Normalized absorption coefficient  | LI                            |
| VIII.7.4                  | Collision induced contribution in the band intensity   | LII                           |
| VIII.8                    | Self broadening and its temperature dependence   | LII                           |
| VIII.9                    | Foreign gas broadening   | LII                           |
| VIII.10                   | Transmittance at the center of a spectral line   | LII                           |
| VIII.11                   | Line mixing (temperature and pressure dependence)  | LIII                          |
| VIII.11.1                 | Temperature dependence of line mixing  | LIII                          |
| VIII.11.2                 | Pressure dependence of line mixing   | LIII                          |
| VIII.12                   | Some formulas for the absorption coefficient $k(\nu)$  | LIII                          |
| VIII.12.1                 | Impact approximation   | LIII                          |
| VIII.12.2                 | First order theory of Rosenkranz   | LIV                           |
| VIII.13                   | CO <sub>2</sub> laser wave guide amplification and power saturation  | LIV                           |
| IX                        | List of symbols  | LVI                           |
